PROFESSIONAL SUMMARY

Cloud Enterprise Resource Planning Consultant with multiple years' experience at Capgemini working on accounts in the public and non-public sector & other industries with a passion for IT, Engineering, Business, Consultancy, Teaching and Personal development. Seeking to utilize foundation of technical and educational experience to continue a career in developing technological business package-based solutions and consistently delivering on projects. Having the ability to work collaboratively with key stakeholders and clients from project concept to closure and produce high quality deliverables that achieve program requirements on schedule and within budget.

SKILLS & COMPETENCIES

- Methodologies: Agile, ITIL, CI/CD, ETL pipelines, Software development lifecycles, Dataset preparation
- Programming: SQL, PL/SQL, Python, Ruby on Rails, JavaScript, HTML5, CSS3
- Cloud Platforms: Oracle Cloud, Google Cloud, Microsoft Azure Cloud, Jira Cloud
- Data Services: Power BI, Excel, Datadog
- DevOps Tools: Git, GitHub
- Frameworks & Libraries: Pandas, TensorFlow, Matplotlib, Seaborn

WORK EXPERIENCE

Capgemini 10/2022 – Present

Cloud Enterprise Resource Planning Consultant

- Deliver and develop package-based software solutions for clients on projects in accounts to achieve quarterly business targets.
- Sign off & conduct software release and reviews using tools Github, WinSCP, putty, Oracle E-Business Suite and Amazon workspaces in production and development environments.
- Conduct sprint planning and problem management on Jira and ServiceNow tickets using Agile, ITIL methodologies, and Miro to support software development cycles.
- Create Oracle APEX low code Applications and User interfaces connecting code scripts, API`s, integrations and Oracle databases.
- Mange relational databases using Oracle SQL developer to query, organize data and create technical reports.
- Work with Agentic AI Studio in Oracle Cloud to create autonomous business workflows.
- Develop with Python Data Science and AI libraries such as Pandas and TensorFlow within Jupyter notebooks via Oracle & Google Cloud to analyze and visualise data from live datasets.
- Lead client workshops on software demonstrations for software solutions, ETL pipelines, applied methodologies and facilitate recording meeting minutes.
- Travel to client sites to meet, maintain and build relationships with business stakeholders.
- Engage in consultancy training to develop Intrapersonal and Interpersonal skills.
- Manage administrative tasks and documentation using Confluence.

Morrison's Holloway Branch 07/2015 – 10/2022

Customer Assistant

- Provide excellent customer service to achieve store sales goals.

Teacheractive 03/2022 – 11/2022
Tutor

- Delivered GCSE Mathematics and English lessons and created structured learning materials.

Get Further Graduate Programme 09/2021 – 05/2022
Graduate Tutor

- Taught GCSE Mathematics and prepared students for exams.

Kingston University 10/2021 – 12/2022
Project Manager Officer

- Supported project coordination and data entry using project management tools.

EDUCATION

Capgemini Early Careers Programme Completed 2022-2024

Kingston University Graduated: 07/2021
Mechanical Engineering BEng – Second Upper Class Honours Degree

University of Hertfordshire 09/2016 – 07/2018
Extended Degree in Engineering (Foundation Year) – Third Class Honours

Barnet and Southgate College – Southgate Campus 09/2013 – 06/2016
BTEC level 3 Extended Diploma in Applied Science - Pass, 09/2014 – 06/2016
BTEC level 3 Subsidiary Diploma in Engineering - Pass, 09/2013 – 07/2014
GCSE English Retake, Grade - C, 09/2013 – 07/2014

PERSONAL PROJECTS

Published on Github - RGithub23

Goole Colab Notebooks

- 3D point clouds generation from images using OpenAI`s Point – E Repository.
- Depth estimation from images to produce depth maps and visual comparisons using MiDaS from Pytorch.
- Data visualization and analysis using Pandas on Fruit prices and Seaborn on palmer penguins' datasets.

Oracle APEX Apps

- Developed Oracle Apex App to generate weather data in the form of temperature, direction and region.

Published on LinkedIn - Dissertation Parametric Modelling of a Cam Shaft Mechanism (Siemens NX)

- Modelled a cam shaft mechanism to apply principles of parametric design.
- Integrated Programming logic into NX Expressions for automated parameter control.
- Built a Product Template Studio interface for designer-friendly resizing.
- Applied knowledge-based engineering to create a reusable, configurable model.
- Conducted motion studies and analytical validation.
