Profile

Cloud ERP Consultant with multiple years' experience at Capgemini delivering technical, functional, and AI-enabled solutions across public sector, telecoms, and internal product teams. Strong foundation in SQL/PLSQL, cloud platforms, data analysis, automation, and engineering-driven problem solving. Skilled at collaborating with stakeholders from concept to deployment, resolving incidents, and producing high-quality deliverables within Agile and ITIL frameworks.

Core Skills

Methodologies: Agile, ITIL, CI/CD, ETL pipelines, Software development lifecycles, Dataset preparation
Programming: SQL, PL/SQL, Python, Ruby on Rails, JavaScript, HTML5, CSS3
Cloud Platforms: Oracle Cloud, Google Cloud, Microsoft Azure Cloud, Jira Cloud
Data Services: Power BI, Excel, Datadog
DevOps Tools: Git, GitHub
Frameworks & Libraries: Pandas, TensorFlow, Matplotlib, Seaborn

Industry Focus

Public sector • Telecoms • Internal cloud product teams • Functional consulting

Recent Professional Experience

Public Sector Client - Enterprise Resource Planning Project
Creating a new managed service team structure by carrying out Oracle EBS configuration, SQL/XML analysis, agile delivery, version control, ServiceNow incident management, and go-live/deployment operations.
Client Product offering – Internal Technical Cloud Project
Developed Oracle Cloud product extensions using SQL/PLSQL, APEX, VBS, and Cloud Integrations, while contributing to emerging agentic AI system development.
Data migration Client – Data Migration Project
Supporting Data Migration for a client by developing with Oracle Cloud product extensions using SQL/PLSQL, APEX, VBS, and Cloud Integrations, while contributing to emerging agentic AI system development.
Client Product offering – Internal Functional Project
Built a new learning platform for functional consultants by creating structured PowerPoint content and publishing it to Degreed, while also supporting graduate and apprentice recruitment workshops.
Telecoms Client:
Built an IT support system for platform engineers, managing SLA-driven technical incidents through Jira/ITSM, analysing issues with Datadog, Excel, Azure and Ruby on Rails, and leading on-call support and candidate training.
